ADVANCING
DISCOVERY

springernature.com/ebooks

Best in Books

Springer Nature offers easy, unlimited access to essential scholarly eBooks across science, medicine, technology, humanities and social sciences. Our aim is to advance discovery and our highly used and cited titles have an impact on learning and research across the world.

We are always looking to the future, exploring the latest technologies and publishing models that will improve user experience, discoverability and facilitate learning. Our flexible eBook solutions grow with your organizations' research objectives and guarantee your users have access to the best content available.

Impactful - highly used and cited

Pioneer in Open Access book publishing since 2011

Innovative publishing focusing on enhanced workflow for authors and readers

On average a Springer Nature eBook:

- is downloaded **8,800 times** in the first year of publication
- is cited 40 times during the first four years of publication

So far Springer Nature have:

- Published over **1,782** OA books
- They have achieved more than **225 million** chapter downloads

Latest innovations

- Piloting automatic translation software and machine generated books
- [SN More Media App](#): developed to access complementary online content available with many books

"The main benefit to our institution has been very high usage in comparison to print formats."

Denise Novak, Senior Librarian & Acquisitions Team Leader, Carnegie Mellon University

The impact of books

We measure the impact of all our books, recording the number of downloads, mentions and citations for each book on the Springer Link platform and SN Insights. We can therefore provide a comprehensive overview of the reach, usage and readership of a book, chapter or entire subject collection.

For our clients we also provide **COUNTER 5** compliant reports to enable the review of usage and user demand in detail.

Comprehensive

We are the largest scholarly book publisher in the world, publishing over 12,000 titles per year. Our rich range of eBooks include every type of publication from brief to major reference work and support every level of user from undergraduate student to research professor.

Springer Nature has dedicated book publishing editors located around the world that collaborate closely with the global research community attracting high quality content from the best authors in both new and established fields of study.

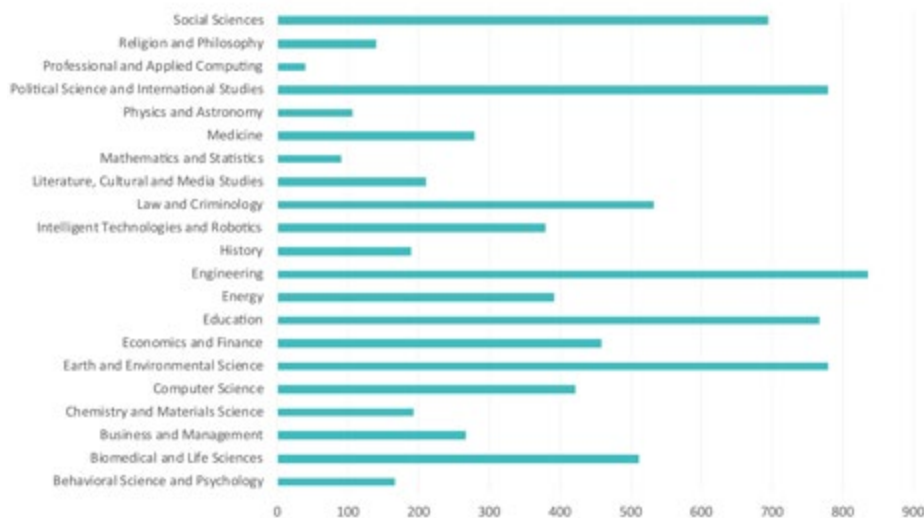

All our eBooks are available on our user-friendly platform Springer Link, which uses effective metadata to make discovery simple.
